DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if

the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Abstract

The abstract of the disclosure is objected to because it is longer than 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claim 1, the phrase "and/or" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "and/or"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim 1 recites the limitation "the transverse workpiece direction".in Page 10, Line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the form" in Page 11, Line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the bending dies" in Page 12, Line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the longitudinal direction" in Page 12, Line 8. There is insufficient antecedent basis for this limitation in the claim.

Regarding claim 7, the phrase "and/or" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "and/or"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim 7 recites the limitation "the transverse workpiece direction" in Page 13, Line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 10 recites the limitation "the bending dies" in Page 14, Line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 10 recites the limitation "the longitudinal direction" in Page 14, Line 9. There is insufficient antecedent basis for this limitation in the claim.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Prior art failed to disclose or imply:

"A bending assembly in a bending machine (1) for bending rod and/or bar-shaped workpiece (8) comprising (a) a bending tool (10) and (b) a bending drive unit (11) including (c) a swivel arm (21) and (ii) [should be (d)] a bending-drive motor (22), said bending tool (10) including (i) at least one workpiece thrust block (12, 13) and (ii) at least one thrust pad (17, 18) on the swivel arm (21), said bending-drive motor (22) being operable to rotate the swivel arm (21) with the thrust pad (17, 18) around a bending axis (14) extending in the transverse workpiece direction, whereby the workpiece, forced by the thrust pad (17, 18) against the associated workpiece thrust block (12, 13), can be bent by rotating the swivel arm (21) with the thrust pad (17, 18) around the workpiece thrust block (12, 13), said bending-drive motor (22) having a motor shaft (27) which extends parallel to the bending axis (14) and is drive-connected at both shaft ends (28, 29) to the swivel arm (21)."

The closest piece of art (Blurton-Jones, 5,992,210) discloses: A bending apparatus which contains some of the claimed elements except for the bending drive unit and its associated mechanism.

However, prior art of record failed to disclose the claimed subject matter as set forth above.

Therefore, the bending assembly for bending machine per claims 1 – 10 herein being allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly label "Comments on Statement of Reasons for Allowance."

Ex parte Quayle

This application is in condition for allowance except for the following formal matters:

Regarding claim 1, the phrase "and/or" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "and/or"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim 1 recites the limitation "the transverse workpiece direction" in Page 10, Line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the form" in Page 11, Line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the bending dies" in Page 12, Line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the longitudinal direction" in Page 12, Line 8. There is insufficient antecedent basis for this limitation in the claim.

Regarding claim 7, the phrase "and/or" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "and/or"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim 7 recites the limitation "the transverse workpiece direction" in Page 13, Line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 10 recites the limitation "the bending dies" in Page 14, Line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 10 recites the limitation "the longitudinal direction" in Page 14, Line 9. There is insufficient antecedent basis for this limitation in the claim.

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C. D. 11,453 O. G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
